OXFORD FABRIC

Fire-Rated

Waterproof

Wind Ready

Our Oxford fabrics stand up just as strong as our tent frames. A double-weave polyester, our Oxford tent fabrics are available in 500D and 250D varieties. Both options are highly-durable, certified fire-retardant, tested to be 100% waterproof, and sewn for wind-resistancy. Strong and stylish, our Oxford fabric line is available in 12 standard (but vibrant!) fabric colors and can be paired with your logo or fully-printed with edge-to-edge graphics.

RECYCLED FABRIC

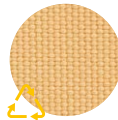

The Recycled fabric line offers three earthy tones made entirely from 100% recycled materials. This polyester fabric repurposed old PET plastic bottles to reduce waste that would otherwise end up in landfills or oceans.

EXPRESS YOUR INDIVIDUALITY

PRINTING YOUR ECOTENT®

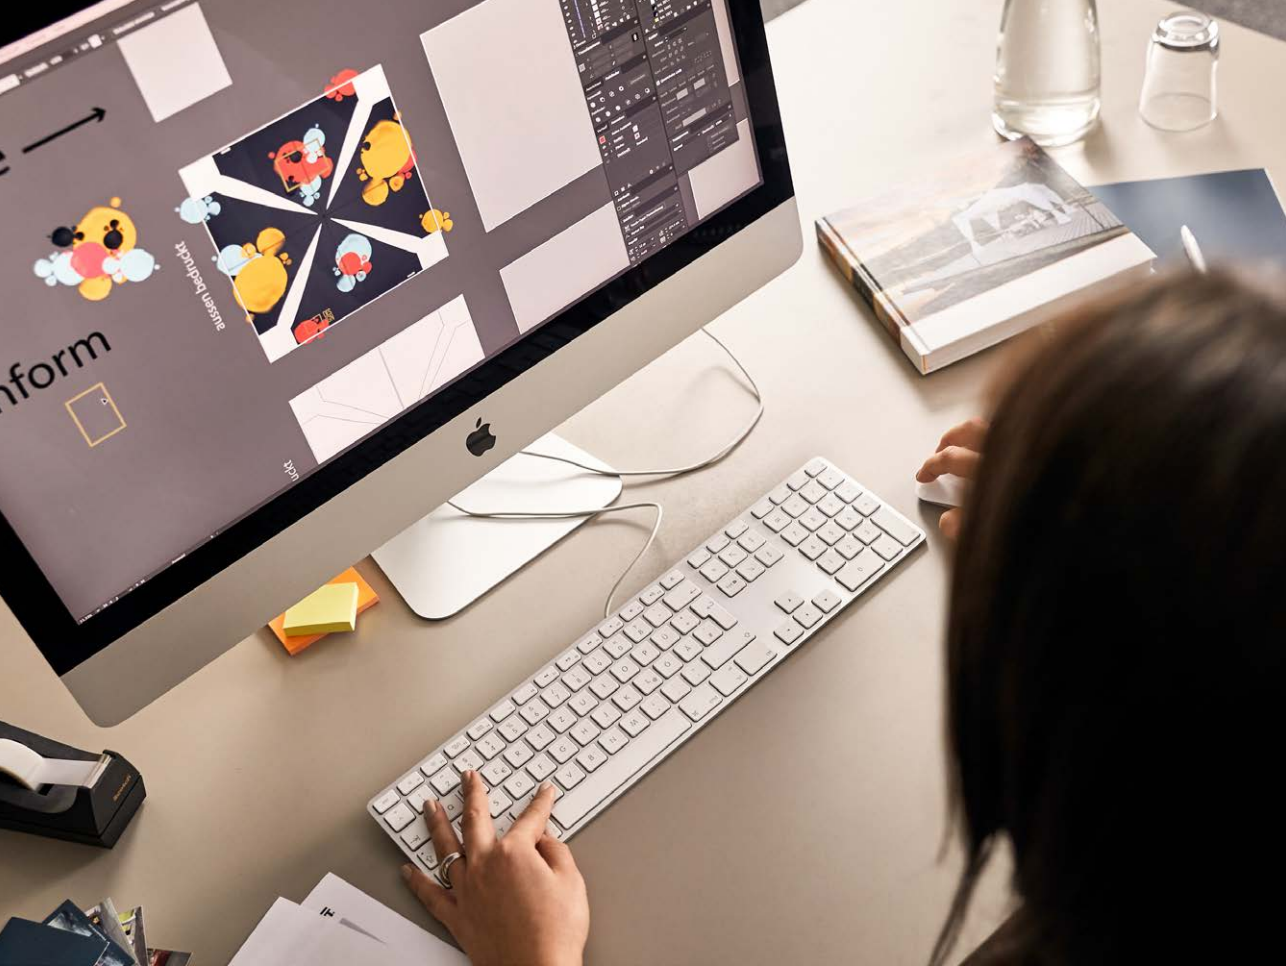

SPOT LOGOS AND GRAPHICS THERMAL PRINTING

Add a logo, tagline, or any individual spot graphic to your tent rooftop or sidewalls with this high-quality heat transfer printing!

EDGE-TO-EDGE GRAPHICS DYE-SUBLIMATION PRINTING

With full-surface printing that embeds the inks deep into your tent fabrics, our dye-sublimation printing process allows you to create completely custom designs, patterns, and colors.

IN-HOUSE GRAPHICS DESIGN TEAM

Our team is here to help you design your dream canopy tent!

We'll take your ideas - and your logo files - and bring them to life in your own personal canopy tent design. Our free design services are all part of the Ecotent® experience.

Want to design your tent yourself? Our team can supply templates and advice as needed!

Idea

PRACTICAL. STYLISH. PROTECTIVE.

TAKE YOUR CHOICE OF SIDEWALLS

Highly flexible, our canopy tent sidewalls easily attach in any combination of styles and arrangements for optimal wind, sun, and rain protection thanks to our weather-ready fabrics.

Available in 4 models: Closed, Roll-Up Door, Window, and Half-Height each sidewall can be customized to your choice of fabric material, fabric color or printed design.

MOUNTING YOUR SIDEWALLS

All Ecotent sidewalls mount to your canopy tent along the tent's roofline as well as down the legs of the tent through the use of heavy-duty Velcro.

COMPLETE WIND PROTECTION

HIDDEN ZIPPER SIDEWALLS

Our E1 line of sidewalls offer even more stability and weather protection by adding hidden zippers to attach sidewalls to the tent and to one another. These zippers allow a completely seamless sidewall wrap - perfect for keeping the weather out or showcasing edge-to-edge printing. These upgraded sidewalls run a protective lower panel of PVC reinforcement at their bottom edge to protect from dirt and debris along the ground.

Strong & Stable

Fast Delivery

TECHNICAL DETAILS

While every tent may just look like a tent on the surface, the attention to detail and thoughtfulness of construction create fundamental changes in the look, performance, and usability of your tent.

INTERLOCKING FRAME CORNER CAPS

These rubber frame caps protect your tent's inner workings and roof fabrics from damages by keeping the frame locked in place to minimize friction.

GROOVED ALUMINUM FRAME PROFILE

High stability, low weight. A third the weight of steel, aluminum doesn't sacrifice strength. Our grooved square leg profile is built larger and thicker for great stability.

EASY PUSH BUTTON SET-UP SYSTEM

The integrated, spring bolt push button system allows for smooth set-up. Pro-Tip: Lift the tent leg, release the push button, and push the footplate to the ground using your foot.

ROOF TENSIONING STRAPS

Lining the interior of your tent's valance, these adjustable Velcro straps bring added tension to your tent rooftop. That tension creates a cleaner presentation, prevents waterpooling, and enhances the visibility of printed designs on your tent's rooftop.

PUSH BUTTON CORNER CLIPS

When the day is over and it's time to pack away your Ecotent, this protective push button allows you to unlock the tent structure at each corner to release and close the tent. No more jams, pinched fingers, or difficult release systems.

SMOOTH SET-UP SLIDERS

A hidden detail for smooth operations. The moving parts of your Ecotent's aluminum structure are padded with surrounding plastic sliders to counteract friction, metal-on-metal wear and tear, and ease every set-up of your canopy tent.

HEAVY-DUTY FOOTPLATES

Built from either aluminum or galvanized steel, these steadfast footplates stand firmly at the base of each tent leg with presence and stability beyond the average tent.

COLOR-MATCHED VELCRO AND ROOF TRIM DETAILS

Every Ecotent roof includes the added detail of color-matched interior Velcro for a sleek design. A small detail that adds into making a killer first impression.

30 YEARS OF PRACTICAL EXPERIENCE, EXTENSIVE KNOW-HOW AND INNOVATIVE SPIRIT.

WARRANTIES, CERTIFICATIONS, & SUSTAINABILITY

OUR PRODUCT WARRANTIES

CERTIFICATIONS

- Every Ecotent® is TÜV-Certified by TÜV-SÜD - an Industry-Trusted Partner in Product and Safety Testing.
- Ecotent® fabrics are certified fire-retardant under safety standards NFPA 701, CPAI-84 Sec. 6, EN 13501-1:2007, and CAN/ULC-S109.*
*The E3 Oxford 250 nFR fabric is excluded from these certifications.
- Our tent fabric materials have successfully tested for their tensile strength.
- Our tent fabric printing inks have received the OEKO-TEX®ECO Passport certifying that substances used are not harmful to human health.
- All materials are REACH compliant.

Certified

» SUSTAINABILITY IS NOT A GOAL, BUT A WAY OF THINKING TO BE INTEGRATED INTO OUR DAILY ACTIONS. «

CEO EU, Managing Director - Georg Zingerle

SUSTAINABLE DEVELOPMENT

As a manufacturing group, we work to be constantly aware of the influence on the environment and the ways that we can positively impact the world around us.

Ongoing initiatives like our solar-powered production facility, our recycled fabric material line, and small touches like our scrap fabric totebags are just the beginning in our efforts to take care of our planet and the people and ecosystems who live here.
